Software developer with over four and a half years of professional experience and one year of working student experience in Nokia Ulm, Germany

EDUCATION

Technische Hochschule Ulm (THU), Ulm, Germany <i>M.Sc. Intelligent Systems</i>	09/2024 – 06/2026
German Integration Course – Inlingua, Ulm, Germany <i>German Language (B1 Level)</i>	02/2024 – 08/2024
Visvesvaraya Technological University, Belagavi, India <i>B.E. Electronics & Communication Engineering CGPA: 8.0 / 10</i>	08/2014 – 06/2018

WORK EXPERIENCE

Nokia, Ulm, Germany <i>Master's Thesis Student Intelligent Systems</i>	12/2025 – Present
- Designed and implemented an end-to-end LLM-based workflow for automated test case generation for radar hardware devices using prompt engineering. - Developed an agentic AI pipeline for autonomous test case generation and refinement with minimal human intervention.	
Nokia, Ulm, Germany <i>Working Student Software Development & Testing</i>	01/2025 – 11/2025
- Implemented test cases in Python to validate a new hardware board, ensuring functional correctness and reliability of embedded components. - Contributed to web development projects including UI design improvements, frontend logic changes, and feature enhancements using standard web technologies. - Collaborated with cross-functional engineering teams in an agile environment, participating in code reviews and iterative development cycles.	
Tata Consultancy Services (TCS), Bengaluru, India <i>Data Engineer SQL Programmer</i>	05/2022 – 05/2023
- Aggregated and curated drug data from heterogeneous sources (databases, XML, JSON, CSV) and stored transformed data in a centralised database for downstream consumption. - Developed stored procedures in SQL for data manipulation and built RESTful APIs to expose curated drug information to end users. - Delivered application development and deployment in Scrum (Agile) and Waterfall environments using Git-based CI/CD pipelines. - Provided L2/L3 production support and handled client communication on requirements and issue resolution for .NET applications.	
Infosys Ltd, Mangaluru, India <i>Technology Analyst .NET Developer</i>	09/2018 – 05/2022
- Led migration of a VB.NET insurance application to C# .NET MVC5 with a Kendo UI upgrade, modernising the full technology stack. - Developed UI/UX features including user registration, policy renewal, document generation, and automated email notifications via Graph API. - Built, tested, and deployed applications using TFS-based CI/CD pipelines, maintaining high release quality and minimal downtime.	

SKILLS

Programming: Python, C# .NET, MVC5, SQL, IBM DB2, JavaScript, HTML, CSS, RESTful API, ADO.NET, Entity Framework
Tools & IDEs: Visual Studio 2019/2022, SQL Server 2016, IBM DB2, GitHub, Docker, MS Office, TFS
Domains: Data Engineering, Hardware & Software Testing, Web Development, CI/CD, Agile/Scrum
Languages: English (Proficient), German (B1), Kannada (Native)

CERTIFICATIONS

- Fundamentals of Building AI Agents – IBM
- Foundational C# with Microsoft – freeCodeCamp
- Infosys Certified C# and MVC Programmer
- Infosys Global Agile Developer Certification
